

Aspirin and Aspirin Like Combinations

Aspirin and aspirin like compounds should not be taken for **10 days** before your surgery or for 2 days after the surgery. We have compiled the following list which, despite its length, is incomplete and constantly changing, to help you identify agents that might fall into this category. **You should check with your internist, primary care physician or health care provider to be sure you are not taking any aspirin, aspirin-like compounds or blood thinners.** If you have any questions about medications you are taking please discuss these with us well in advance of surgery. **Tylenol may be taken.**

THIS IS NOT AN ALL INCLUSIVE LIST – IF YOU ARE CONCERNED ABOUT A MEDICATION NOT ON THE LIST PLEASE CONTACT YOUR PRIMARY CARE DOCTOR OR PHARMACIST TO SEE IF IT INCLUDES BLOOD THINNERS

Aches-N-Pain
